Wattyl is a paint and surface coatings company that produces a broad range of paints, varnishes, lacquers and special purpose protective coatings. Our products are used by individuals, contract painters and industrial customers. With operations in Australia and New Zealand, the Wattyl Group employs over 2000 people. The company's origins date back to 1915 where, in an Australian backyard, H.R.Walters developed a treatment for reviving French-polished furniture. This innovative product, known as 'Crystal Veneer' became an immediate success and laid the foundation of Wattyl's future success.

From its humble backyard beginnings to its listing on the Australian Stock Exchange in 1959, Wattyl through innovation, research and development, acquisitions, and organic growth has become a leading Australasian-owned paint manufacturer.

Taubmans EcoProof is an example of our innovation and commitment to a healthy environment. Taubmans EcoProof is a unique system, it is the only paint that the Asthma Respiratory Foundation of New Zealand have approved as part of their Sensitive Choice stable of products as being better suited for people with asthma and allergies.

Below is a list of Wattyl (NZ) Limited products that have the Environmental Choice licence:

EC-07-18 Paints (/specifications/ec-07-18/)
