RE: Product declaration and typology classification in regards to Green Star NZ requirements

Dear Alex,

I hereby confirm that Action Fabricators supplies Interface Inc. with the product subsequently marketed as 'TacTiles'.

This material is manufactured as an adhesive tape. It is produced as a pressure sensitive adhesive and laminated to the top PET film after the PSA is made.

As such, we envisage that it can be excluded from the requirement to demonstrate low VOC compliance in accordance with District Rule 1168, as per the exemption clause notified in the Green Star NZ Technical Manual.

As a matter of demonstrating best practice, this product, under the brand name 'TacTiles' has successfully achieved Green Label Plus certification, consolidating its status as a low VOC product.

Yours Sincerely,

A handwritten signature in black ink, appearing to read "David Gibbs", is written over a light blue horizontal line.

David Gibbs
