

Company: Nauhria Reinforcing

Products: NatSteel GreenTag GreenRate certified steel with EPD

Document number: EVS-25-107a

Issue Date: 13 May 2025

Subject 1: Validity of eco-label certifications expiry dates and RPV scores

As part of its independent product verification activities, EnviroSpec regularly refers to and reviews product eco-label certifications.

Depending on the certification body, these are valid for a period of 12 months to several years, and are regularly renewed through re-auditing activities carried out by the relevant certificate or label issuing Authority.

For any given time that a product is deemed to have a valid label / certification, the manufacturer and certified product names are notified on the relevant Authority's website. A print out of the relevant websites showing nominated products is therefore a suitable and satisfactory form of evidence that the product is certified at the time, and remains certified until removed from the website altogether.

As at the date of writing this letter, EnviroSpec has identified the product certifications contributing towards an RPV as follows:

- Product Specific EPDs
<https://www.greenbooklive.com/search/advancedsearchresults.jsp?companyName=natsteel>
- GreenTag GreenRate Level A certification
<https://www.globalgreentag.com/products/reinforced-bar-precut-deformed-bar-wire/>
- Eco-Choice Aotearoa certification
<https://ecochoiceaotearoa.org.nz/our-partners/natsteel-holdings-pte-ltd/>

The above achieves RPV 15 in accordance with the GBCA Score-checker at the time of writing this document.
