NatSteel traces its lineage to 1961, when it was incorporated as National Iron and Steel Mills. A pioneer and key partner in Singapore's nation building efforts, our products are used in most construction projects island-wide, from the iconic Changi International Airport to the public housing that is the trademark of Singapore's landscape.

Singapore is home to NatSteel's headquarters as well as its flagship plant, which boasts one of the largest single downstream rebar fabrication operations in the world. Integrating upstream and downstream operation, steel is manufactured through recycling scrap, and fabricated according to customers' needs.

Today, NatSteel offers products such as Rebar, Deformed Bar in Coil (DBIC), Wire Rod while offering fabrication services such as Cut and Bend (CAB), Mesh and Cages.

Licence No: 4124191

Hard drawn wire in Coil
